

A close-up, low-angle shot of a person's face as they look through the eyepiece of a microscope. The scene is dimly lit with a strong blue hue, typical of a laboratory environment. The person's hair is dark and pulled back. The microscope's eyepiece is prominent in the foreground, with the text 'E-PI 10x/20' visible on its side. The background is blurred, showing some indistinct shapes and a small red light source.
