VULNERABILITY OF THE MEDICINE SUPPLY CHAIN

**MANUFACTURE OF THE MEDICINE**
- Sole manufacturer
- Shortage of raw material
- Tighter quality and environmental standards
- Natural disaster
- Quality defect

**MANUFACTURE OF ACTIVE PHARMACEUTICAL SUBSTANCES**
- Unexpected changes in demand (increase in global demand, epidemics, public health campaigns, stock-outs of a competitor, etc.)
- Manufacturing capacity unable to meet changes in demand (unpredictability of tendering)
- Quality or manufacturing defect
- Production stoppage due to regulatory adjustments
- Non-conformity of infrequently manufactured products
- Price of medicine too low

**TRANSPORTATION PROBLEMS**
- Unequal distribution across France
- Parallel exports
- Oversized storage practices in case of suspected shortage

**DISTRIBUTION OF THE MEDICINE**

**DISPENSING OF THE MEDICINE**
